

# Training on Social aspects of Sustainability

The University of Tabuk is committed to promoting sustainability across all aspects of university life, including its social dimensions. As part of this commitment, the institution provides dedicated training and educational opportunities on the social aspects of sustainability for both students and staff. These initiatives focus on fostering an understanding of social equity, community engagement, ethical practices, and the broader impact of sustainable development on society. Through workshops, seminars, and collaborative projects, the university aims to equip individuals with the knowledge and skills needed to contribute positively to social sustainability, both within the university and in the wider community.

For students, the Deanship of Student Affairs plays a key role by offering workshops, events, and exhibitions that focus on social sustainability, community engagement, and ethical practices. These initiatives are designed to raise awareness and empower students to actively participate in sustainable development both within the university and in society. Through these activities, students gain valuable insights and practical experience in contributing to a more equitable and sustainable world.

**As part of the agenda for the first visit of the visiting researcher, Professor Shozeb Haider from University College London (UCL), to the University of Tabuk.**

The Deanship of Research and Graduate Studies in cooperation with the Prince Fahd bin Sultan Chair for Biomedical Research, invites you to attend a scientific seminar

**Titled**

**Structural Biology with AlphaFold3**

**Speaker:**

**Prof. Shozeb Haider**  
Visiting Researcher at the Prince Fahd bin Sultan Chair for Biomedical Research at University of Tabuk.  
Professor of Computational Biophysics, School of Pharmacy, University College London (UCL)

Citation Index (H-Index): 53  
Published numerous scientific papers in high ranking journals, including Nature, Nature Genetics, Nature Medicine, and Nature Communications.

**Research interests for the visiting researcher:**  
Drug discovery, antibacterial resistance, anticancer agents, rare disease utilizing advanced computational methodologies.

**Target group:**  
Postgraduate students - Undergraduate students

Certificates will be provided to attendees

Thursday 4-3-2025, 12:00 p.m - 1:00 p.m  
The Theater of the faculty of Applied Medical Sciences

**The Deanship of Research and Graduate Studies invites you to attend a workshop in cooperation with the Deanship of Quality and Academic Accreditation**

**Workshop title**

The mechanisms for integrating scientific research with the industrial sector. **Advanced strategies for transforming academic discoveries into practical solutions.**

**Workshop presenter:**

**Dr. Hussain Mohammad Bassi**  
Senior Expert - Energy  
Water Technologies Innovation Institute and Research Advancement (WTHIRA)  
Saudi Water Authority (SWA)

**Workshop themes:**  
Analysis of the current situation and challenges  
Advanced strategies for integration  
Development of support and funding mechanisms

**Workshop Moderator:** Eman Alatwi  
Deanship of Research and Graduate Studies

**Target group:**  
Faculty members  
Researchers

Tuesday 4/2/2025 8:00 P.M

To attend

Certificates will be provided to all attendees
